

# Aerial Interactive 360 Panoramas

*"Captivating, interactive and  
fully immersive web based  
presentations and  
experiences"*

## Virtual Reality Services

# About Us

Altitude Imaging has been providing a comprehensive commercial drone service specialising in the provision of aerial photography, video, survey and inspection solutions for a range of industries since 2012.

Based in Perth, Altitude Imaging is one of Australia's most experienced certified commercial drone operations companies with a track record of successful projects across city, urban and remote country locations.

Altitude Imaging is fully certified and insured, the company holds CASA ReOC 0669 and our pilots all hold CASA Remote Pilots Licenses.

## Interactive 360 Panoramas and Virtual Tours

Altitude Imaging uses the latest immersive technology to create captivating aerial 360 panoramas and virtual tours. We capture multiple aerial images and process them into a fully interactive web based image enabling the viewer to move and zoom in any direction.

Our 360 panoramas can be linked to produce virtual tours allowing the viewer to jump to new locations. All of our 360 interactive content is are fully customisable with the addition of graphics and text.

Captivating, interactive marketing presentations guaranteed to thoroughly immerse viewers. They'll feel like they're actually there!

Not just for marketing, interactive 360's are ideal to show construction site progress in fine detail. Show entire subdivision developments with a single web link. Add a hyperlink to the interactive 360 in your email or construction progress report. Easily show clients and prospective buyers progress on site.

*"Fully customisable content that can be hosted by us or embedded into your website."*

## Features and Benefits

- ✓ Internet based interactive panoramas are ideal to present a location and proximity to landmarks.
- ✓ Our interactive 360 content allows viewers to interact with the presentation, so they feel like they're in control of what they see and become more engaged with your website.
- ✓ Can be viewed on desktops, tablets, mobiles, VR headsets and many other web enabled devices.
- ✓ Fully compatible with social media sites like Facebook.
- ✓ Prospective views from any floor of an apartment or office tower.
- ✓ With our 42mp cameras we can capture gigapixel sized panoramas with incredible resolution enabling you to zoom into far away locations.
