

Aerial
Photography
and Video

*"Brilliant aerial photography
and video.
Every time, every angle,
day or night."*

Photography & Video Services

About Us

Altitude Imaging has been providing a comprehensive commercial drone service specialising in the provision of aerial photography, video, survey and inspection solutions for a range of industries since 2012.

Based in Perth, Altitude Imaging is one of Australia's most experienced certified commercial drone operations companies with a track record of successful projects across city, urban and remote country locations.

Altitude Imaging is fully certified and insured, the company holds CASA ReOC 0669 and our pilots all hold CASA Remote Pilots Licenses.

Photography and Video Services

We shoot perfectly framed, brilliant, colourful and vibrant aerial photographs and video providing amazing perspectives anytime day or night.

With a range of professional equipment we deliver outstanding production value by replacing the set-up time, cost and physical limitations of jibs, booms, platforms, cranes and dollies.

We work with client teams creatively and collaboratively to achieve excellence on every shoot and get the hero shot every time. On site we work as a seamless part of your team under direction or autonomously working to your brief.

Altitude Imaging works with some of the leading production companies in Perth. We are happy to provide unedited images and video or fully edited photographs and video productions depending on your requirements.

Our work is regularly seen across all media platforms from television through to social media. Our clients include leading production companies, television studios and networks, advertising agencies, companies in all market sectors, governments and property developers.

"With great equipment, highly skilled and experienced pilots and camera operators we deliver perfectly framed shots every time in the most demanding environments."

Features and Benefits

- ✓ Our flight time is unlimited and we can operate day and night.
- ✓ More precise, less intrusive, and more cost effective than manned aircraft or helicopters.
- ✓ Highly skilled and experienced remote pilots and professional aerial photographers and cinematographers producing emotive cinematic content.
- ✓ Flexibility to adapt and operate in a fast moving site environment including remote and inaccessible areas.
- ✓ Licenced to operate at night and within 15m of actors and extras.
- ✓ Conventional crane/dolly style shots, Steadicam style footage and Multi camera angles in the same sequence.
- ✓ Flexible punch outs with upward or downward facing cameras, Chase scenes, Panoramic fly arounds.
- ✓ Prompt delivery of photographs and video.

"Our attention to detail, focus on safety and collaborative approach to everything we do sets us apart."
